

MANIFESTO *for*

FOOD SOVEREIGN CHURCHES

by
Rev Dele

"Though I plant in raised beds and open ground, if I don't plant the Holy Spirit in people's hearts, it profits me nothing. I am spreading raw manure on concrete.

If I raise the most abundant food systems: regenerative in design, locally owned, democratically controlled with water sovereignty; if I harvest the greatest yield using minimal effort, and clock the greatest number of volunteer hours, if participants don't learn the mysteries of the Earth, I have done nothing.

If I start gardens in all 50 states for free so that I may boast, while participants do not love and become one with the master gardener of all souls, I produce nothing."

People and Plants Mature in the Same Garden.
